

The tougher it gets to be a kid.....

The tougher it gets to be a parent!

We promise concrete answers for your questions:

- *Never argue again with your child.*
- *Learn how to “out-will” a strong-willed child.*
- *Improve school attendance and performance.*
- *This program is a blameless program that will give you the tools to help enhance your family as a whole.*
- *Find resources to help.*

The overwhelming majority of parents deeply love and care about their children. Unfortunately, for many high risk families, repeated frustrations and failures combined with the daily stresses of life often lead to feelings of helplessness. Parents may have given up because they felt success was unattainable.

The **Parent Project** is an entirely new parent training model. It not only delivers new skills and insights, it rekindles hope. Parent attending **Parent Project** classes have the opportunity to experience success at home within the first week.

The **Parent Project** was developed over a ten year period while working with thousands of high-risk families. It is designed to revive parent’s desire, teach the skills, and provide the practical and emotional support they need to change destructive adolescent behavior. It directly addresses some of the most serious questions we are asked again and again.

**GIVE US 24 HRS AND WE WILL
CHANGE YOUR LIFE!**

.....
